

4 Main Businesses

PD (Production)

- > Brush
- > Tool Regrind
- > Tool Modify/Repair/Coating
- > Grinding stone change service

ITM (Information Technology Management)

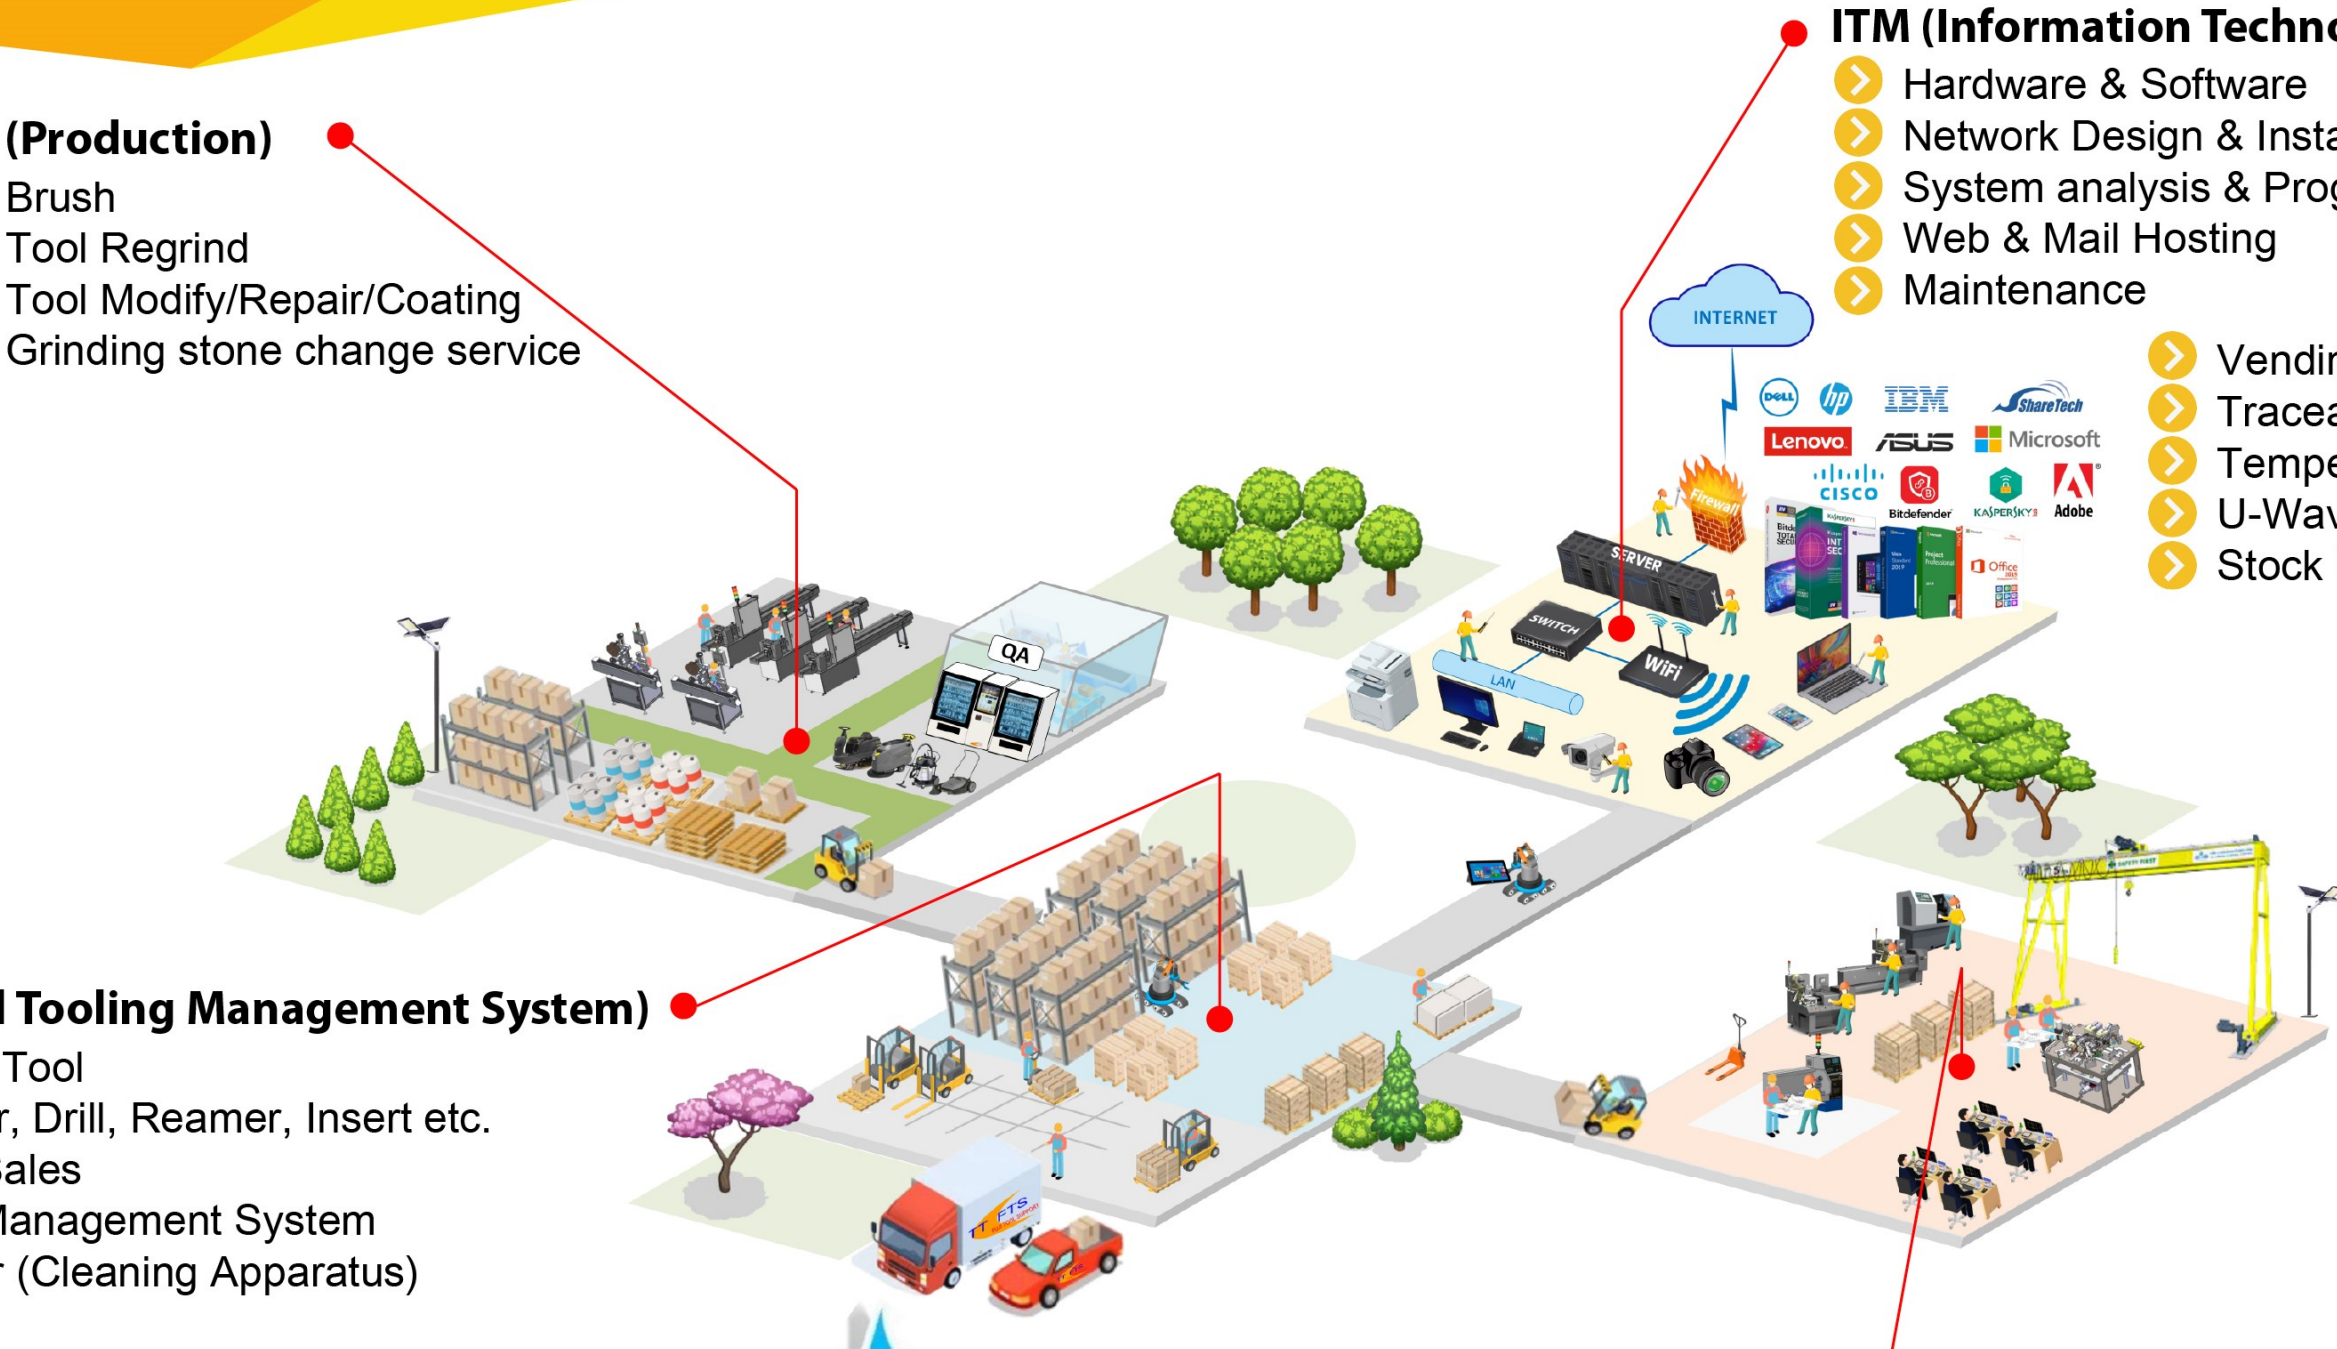

- > Hardware & Software
- > Network Design & Installation
- > System analysis & Programming
- > Web & Mail Hosting
- > Maintenance
- > Vending Machine
- > Traceability System
- > Temperature Control
- > U-Wave System
- > Stock Management System

TMS (Total Tooling Management System)

- > Cutting Tool
 - *Holder, Drill, Reamer, Insert etc.
- > Retail Sales
- > Stock Management System
- > Karcher (Cleaning Apparatus)

FTK (FULL TURN KEY)

- > Machine Set up
- > Various jigs for processing, assembly, inspection, etc.
- > EKO & Karakuri
- > 3D Printer service

TMS Business

We are more than
Stock Management

Stock Control

We manage inventory by using KANBAN so that our customers can receive the goods in the right amount and time. And we will deliver the goods for customer satisfaction.

Quality Control

Accepted inspection are performed using calibrated various inspection equipment.

Cost, Kaizen Control

We can make cost reports based on customer usage records. We will support cutting tool cost reduction through KAIZEN activities.

PD Business

Regrinding Support

Tool Type	Diameter (mm)
Drill	2.5-30
Step drill	4.0-30
Burnishing drill	4.0-30
Reamer	4.0-30
Cutter	8.0-40
Endmill	4.0-30
Center drill	4.0-30
Tap	M6-M20

Length : 15-200 mm
Material : Carbide, HSS

- 100% Guarantee
- Delivery 3-10 days
- Regrind with high quality machine
- Regrinding drawing creation

Tooling Support

Grinding stone change service

- No dresser needed before use
- Tool life equivalent to new product
- Equivalent quality to those made in Japan
- Cost reduction and lead time reduction due to local production.

Brush

- Brush Material:
Shank – SUS; Steel
Bristle – 66 NY; Carbide
- Fast sample offer
- Tool life standard
- Engineering support

CMM (Coordinate Measuring Machine)

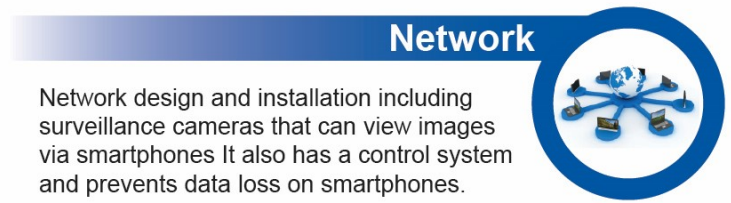

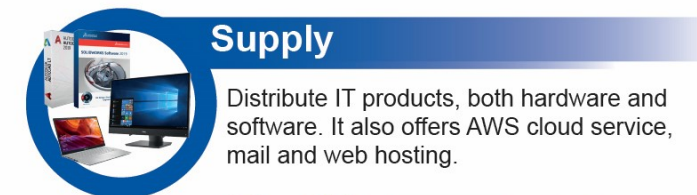

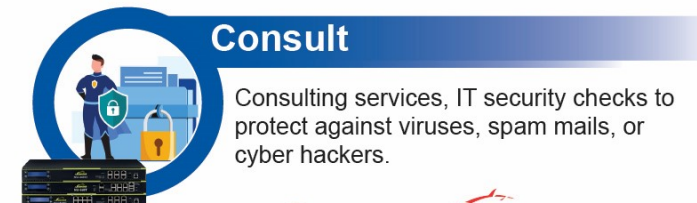

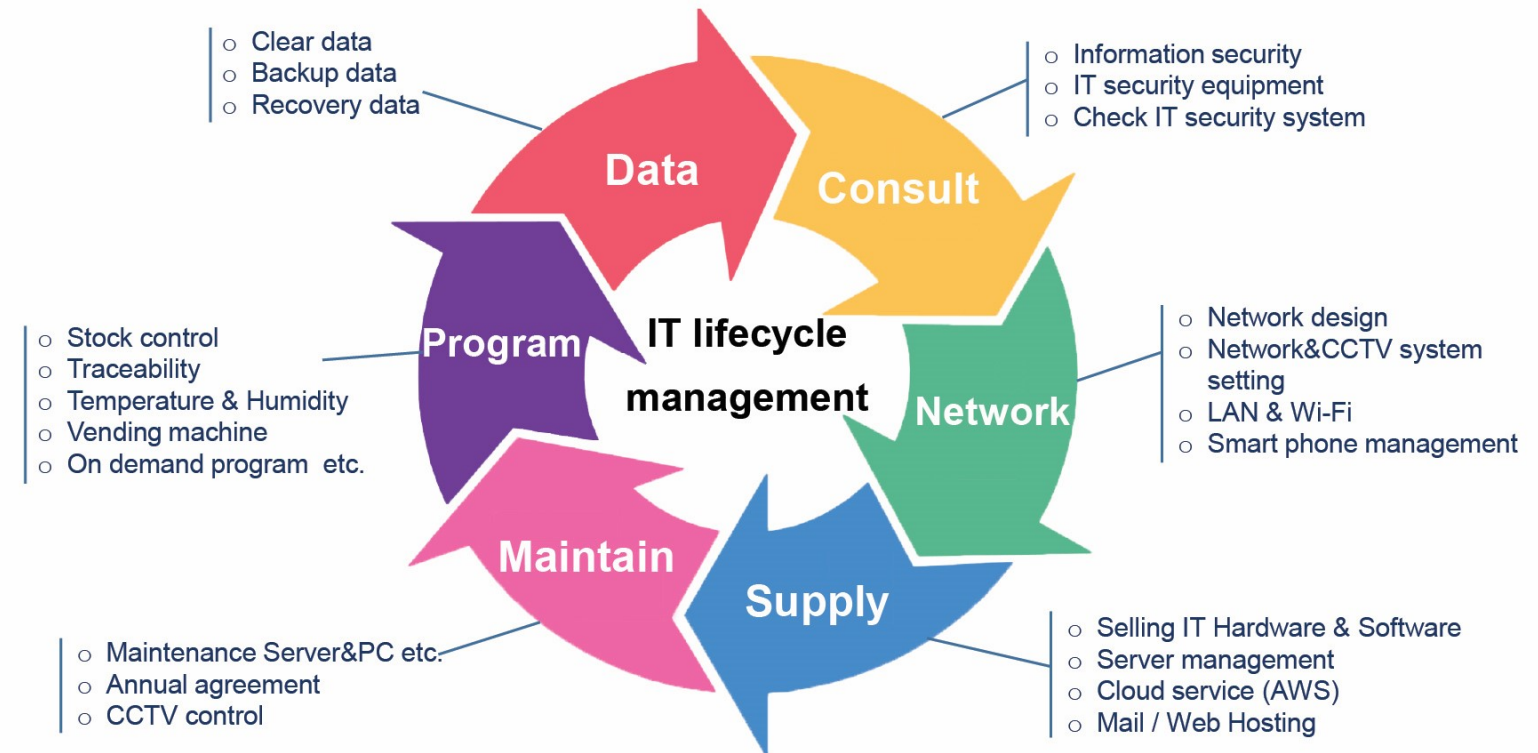

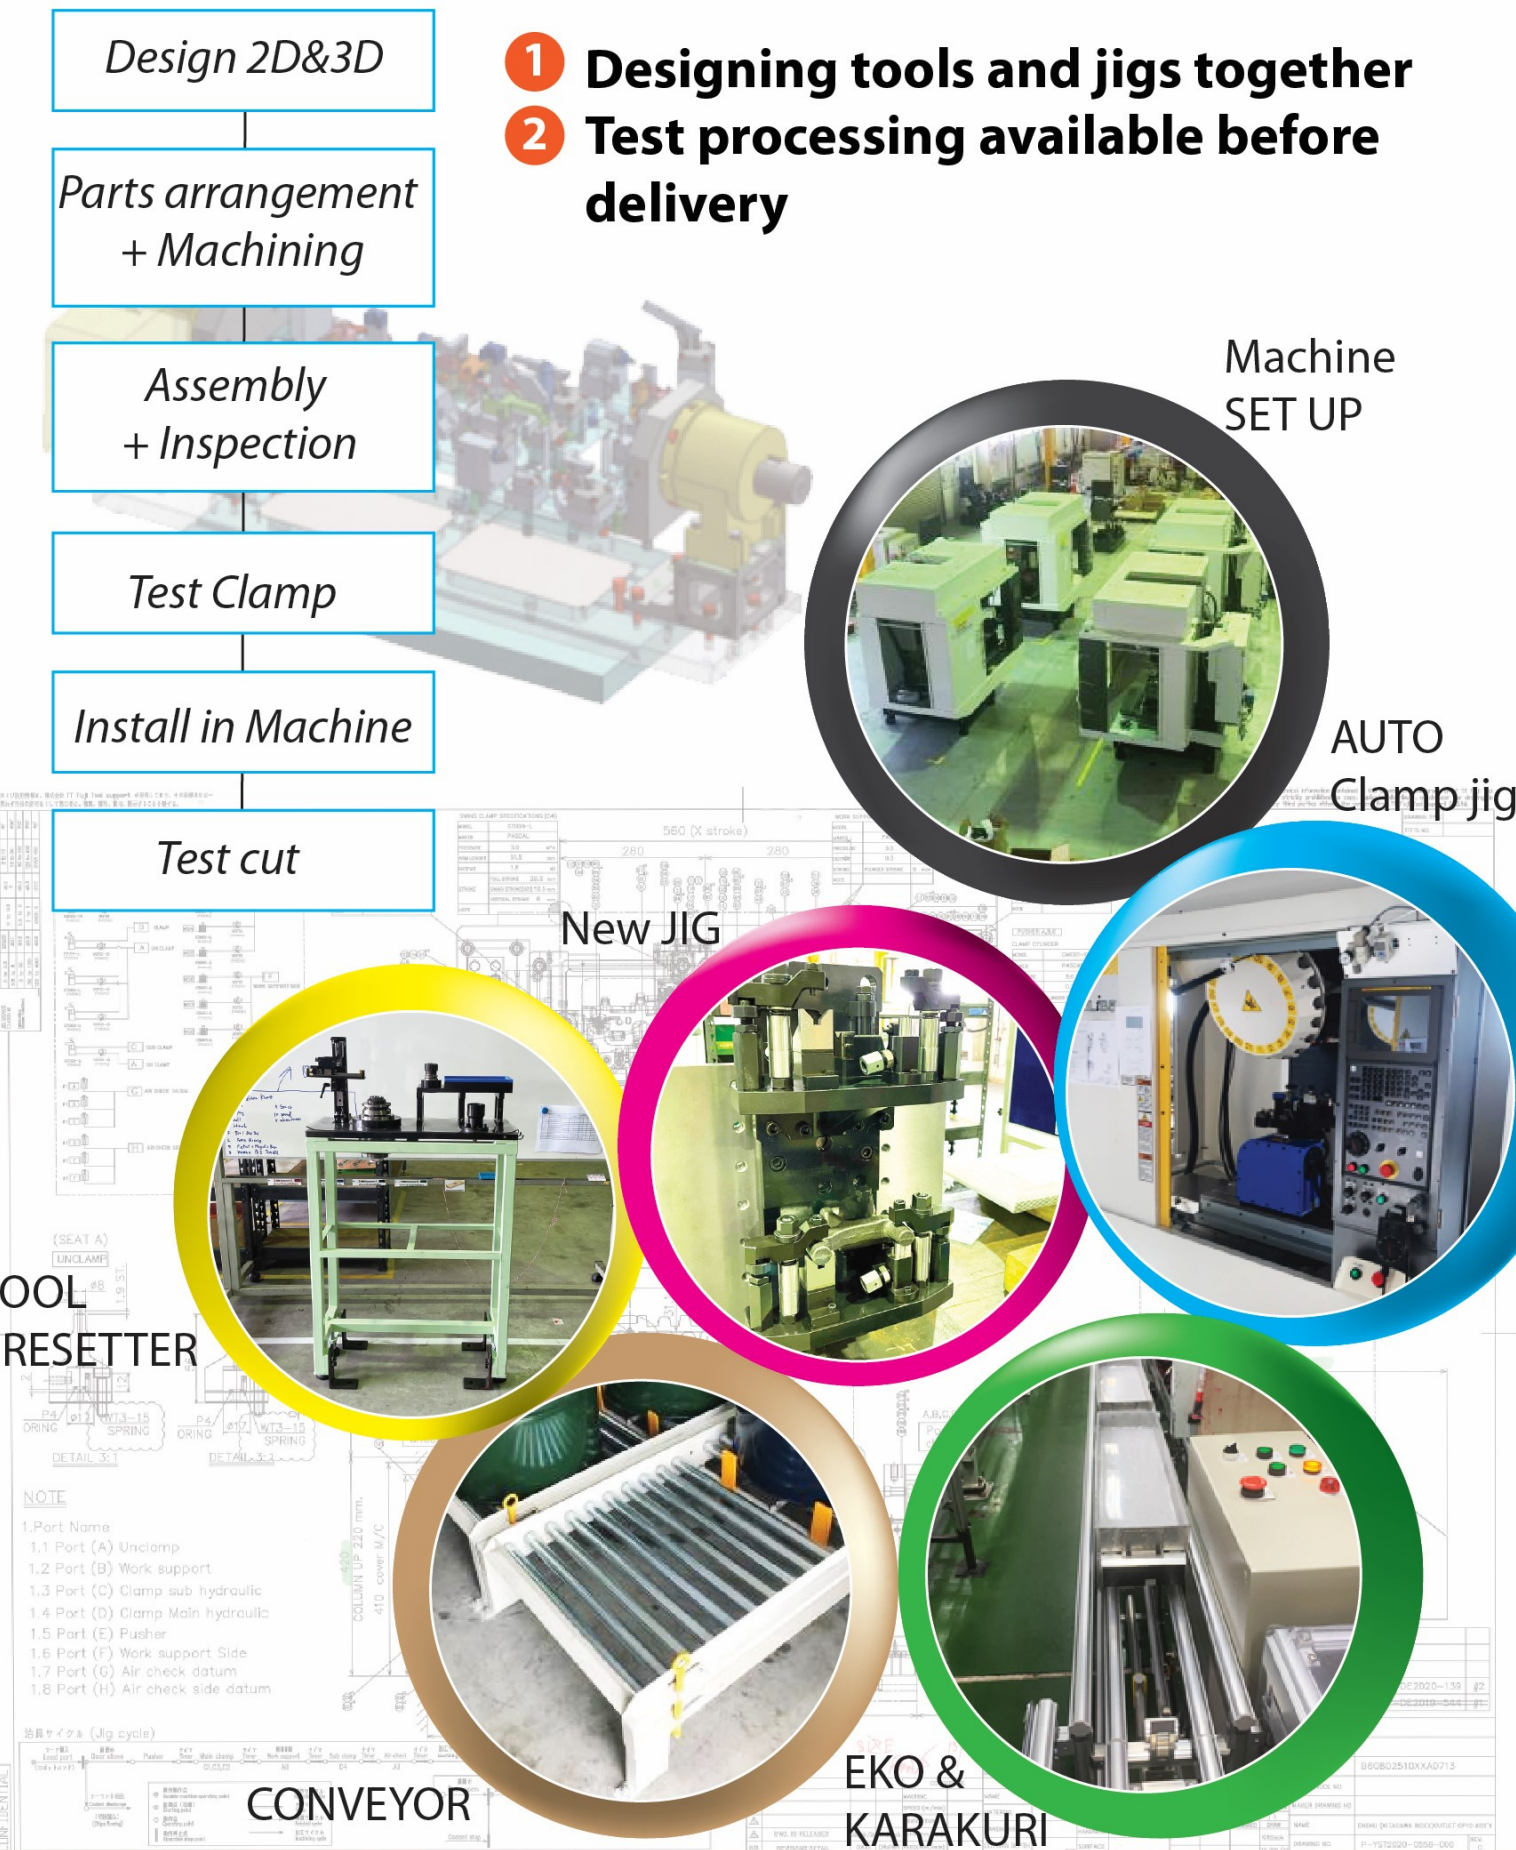

3D Measuring machine

Contour and roughness check

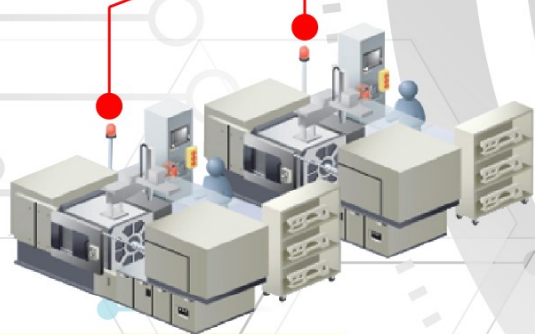

Full IT lifecycle management

Smart Factory

Temperature monitoring

Temperature and humidity detector to monitor real-time production environment via smart devices, including coolant temperature; alert function to be activated upon the exceeding set values

Stock Management system

MRP or ERP Stock Management System as required by customers starting from raw material → production process (BOM) → finished goods; experience in tool management system for more than 15 years of TTFTS as an expertise in the field!!!

Cloud Server

Traceability system

Tracking back the production in order to get to the root cause of the problems and prevent NG products slipped out to customers; machine data to be retrieved and processed in accordance with customers' requirements

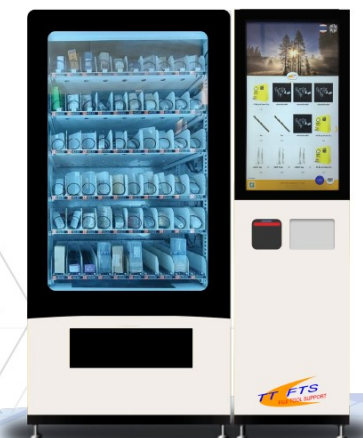

Andon system

To run the production as planned; problem incurred to any machine to be detected at once leading to immediate problem solvings without being physically at the machines

Vending machine

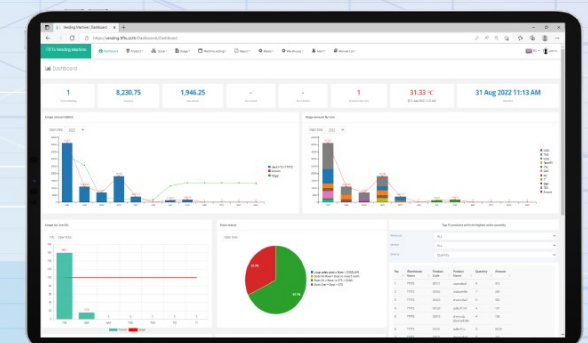

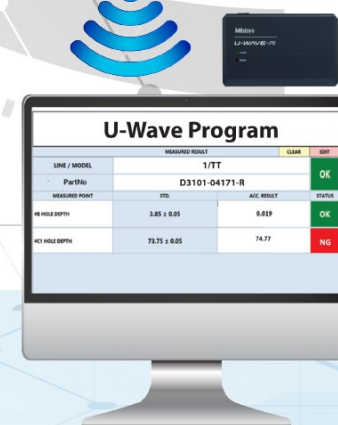

Automatic tool disbursement system, easy to use, minimizing losses by setting up users' authorization:

- daily/weekly/monthly quantities to be allowed
- max/min quantity as re-order point
- consumption report
- real-time stock status

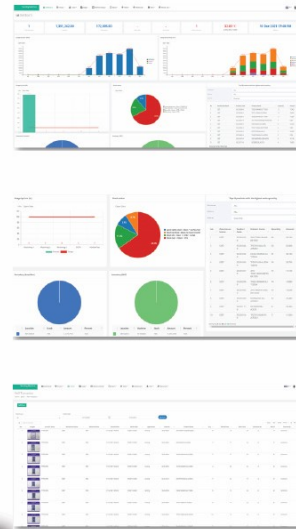

U-wave system

Paperless inspection system; upon finishing the measurement, measuring data to be input in the system with the result if OK or NG; being faster, better accuracy "U-wave System"!!!

Special product

Vending machine

FEATURE

- ✓ Storage on site, One-stop service for distribution, return&inquiry
- ✓ Reduce cost&Man power in operation
- ✓ Automatic alert&report
- ✓ Optimize inventory
- ✓ Data retroactively
- ✓ Smart dispensing system

AIR TOOLS

High efficiency, simple structure, durable and so on.
mainly used for assembly industry screws tightening and loose.

AIR TOOLS

- AIR SCREWDRIVER
- AIR TORQUE CONTROL SCREWDRIVER
- AIR RATCHET WRENCH
- AIR IMPACT WRENCH
- AIR DRILL

Calculate electricity consumption and choose lamps to suit the customer's area by experts.
